written plan

1. Design website layout and find mini car description.

2. Write the website. Write HTML and CSS.

3. Create the database. Use phpMyAdmain to create a database, add three kinds of mini

cars and add some car data.

4. Connect to database: Use PHP and API, link sql data and connect to database using

PHP.

5. Use Vue.js: Use vue.js to display the three cars.

6. Create AJAX request.
